**Southern African Telecommunication Networks and Applications Conference (SATNAC)
2003 Proceedings (CD-ROM)**

Document design and layout by Zoltan Miklos (Telkom SA Limited) – Technology Network Services.

ISBN 0-620-30949-0

SATNAC is the flagship of the Telkom Centre of Excellence (CoE) Programme.

Access Network Papers

- Title: An Iterative Multiuser Detector for DS-CDMA
Authors: E.O. Bejide and F. Takawira (University of Natal)
- Title: A Comparison of Parametric Subspace Delay Estimation Algorithms for DS/CDMA Systems
Authors: M.Y. Abdul Gaffar, A. D. Broadhurst and F. Takawira (University of Natal)
- Title: Convergence Analysis of the LCCMA in an Asynchronous DS-CDMA System
Authors: J. Whitehead and F. Takawira (University of Natal)
- Title: Outage Analysis of a Downlink Load-Based Admission Policy for Multiservice Cellular Networks
Authors: N.B. Ramlakhan and F. Takawira (University of Natal)
- Title: Delay Based Call Admission Control for Next Generation Wireless Cellular Networks
Authors: T. Walingo and F. Takawira (University of Natal)
- Title: Adaptive Receiver Structure for UMTS FDD in Multipath Channels Characterised by Long Delay Spreads
Authors: P.P. Motsoasele and P.J. Chitamu (University of the Witwatersrand)
- Title: An Ad-hoc On-Demand Routing Algorithm for a Positional Communication System
Authors: T.A. Quazi and S. McDonald (University of Natal)
- Title: A Location Aided Multicasting Protocol (LAMP) for Sparse Ad-hoc Networks
Authors: N.J. Dearham and S. McDonald (University of Natal)
- Title: Analytical Results for the Capacity of Spatially Correlated MIMO Channels
Authors: G.J. Byers and F. Takawira (University of Natal)
- Title: Error-Correcting Codes Based on Irregular Graphs
Authors: T.M.N. Ngatched and F. Takawira (University of Natal)
- Title: Improved Performance of the MMSE Linear Equalizer in Turbo Equalization by the use of Extrinsic Feedback Information
Authors: M.Y. Abdul Gaffar, H. Xu and F. Takawira (University of Natal)
- Title: A Comparative Study of Space-Time- Frequency Coded Systems for Broadband Channels
Authors: R. N. Akol and F. Takawira (University of Natal)
- Title: Radio Resource Allocation and Multiplexing of Voice and Data over IP in a GSM/GPRS Cellular Network
Authors: D.E. Vannucci & P.J. Chitamu (University of the Witwatersrand)
- Title: Modeling IP-Based Powerline Network and Interconnections with Wireless Networks for Communication in Non-Urban and Low Density Areas of Developing Countries
Authors: J. Anatory, N.H. Mvungi and M. M. Kissaka (University of Dar es salaam)
- Title: Using Time-Spreading to Combat Multi-user Interference in ADSL and VDSL Systems
Authors: J.H. van Wyk and L.P. Linde (University of Pretoria)
- Title: 'Self'-Reconfiguring Programmer for an FPGA-Based Software Radio
Authors: I. Zibani, and D.S. Dawoud (University of Natal)
- Title: VoIP For A Rural Distributed Network Architecture
Authors: S. Saib, R. Sewsunker and Dr P.J. Chitamu (University of Durban-Westville)
- Title: ATM WAN In Rural Area
Authors: S.J. Mbatha and T.J. Afullo (University of Durban Westville)
- Title: A MAC Protocol for Wireless IP Networks
Authors: S.B. Mahlaba and F. Takawira (University of Natal)
- Title: Public Wireless LANs: A Threat or Opportunity for Network Operators?
Authors: R. Cazalet (Siemens Telecommunications)
- Title: Inter-Subnet Mobile IP Handoff in 802.11 Wireless LANs
Authors: A.Hasson and N. Ventura (University of Cape Town)

- Title: The Study of Band Sharing for GSM900 and cdma2000 1x Co-existence within the 900 MHz Cellular Band
Authors: P. Latchman and P. Chitamu (University of the Witwatersrand)
- Title: Channel Normalization for GSM Speech Recognition
Authors: N.S. Mahlanyane and D.J. Mashao (University of Cape Town)
- Title: Fruition beyond 2.5G: Mobilizing South Africa's Wireless Data Transition
Authors: J. Murray and P.J. Chitamu (University of the Witwatersrand)

ATM Papers

- Title: Route Optimization for Minimizing Inter-Switch Handoff Dropped Calls in Wireless ATM Networks
Authors: S. Mtika and F. Takawira (University of Natal)
- Title: A Mobility Enhanced ATM Switch and Signalling Architecture to support handoff in a Wireless ATM Network
Authors: F. Smith, N. Ventura (University of Cape Town)
- Title: Providing QoS for the AAL2 connection on the Iub interface of the UTRAN
Authors: X. Fomana and N. Ventura (University of Cape Town)
- Title: Dynamic Bandwidth Allocation of AAL2 connections in the UTRAN
Authors: S. Waller and N. Ventura (University of Cape Town)
- Title: Performance Analysis of an AAL2 Switching Node
Authors: S. Shepstone and N. Ventura (University of Cape Town)
- Title: An Application Level Scheduler and Connection Manager for Adaptive Applications on a Wireless ATM Network
Authors: C. Warner and N. Ventura (University of Cape Town)

Broadband Services Papers

- Title: Concurrent Control of IEEE-1394 Devices Using Universal Plug and Play and Audio Video Control Protocols
Authors: D. Siebörger and R. Foss (Rhodes University)
- Title: Video Compression System for Mobile Devices
Authors: E.S. Jackson, R. Peplow (University of Natal)
- Title: LSTM Recurrent Neural Networks for Signature Verification
Authors: C. Tiflin and C.W. Omlin (University of the Western Cape)
- Title: A digital watermarking scheme for Bezier surfaces
Authors: J. Chadwick (University of Forte Hare), S.Bangay and P. Wentworth (Rhodes University)
- Title: Benchmark for Modern Wavelet Based Still Image Compression
Authors: Y. Brijmohan and S.H. Mneney (University of Natal)
- Title: Full 6-DOF Head Pose Recovery: A Parameterized Structure From Motion Approach
Authors: J. Heathcote, B. Naidoo and S. McDonald (University of Natal)
- Title: A Dynamic, Runtime-Extensible, Client-Managed Service Framework
Authors: D. Parry, G. Wells and P. Clayton (Rhodes University)
- Title: Using Java Speech Grammars as Cache Memory for Databases in VoiceXML Applications
Authors: S.D. Eyono Obono and M.J. Serumaga-Zake (University of the North West)
- Title: DRUBIS: Distributed XML Driven Biometric Identification System
Authors: M. Ndlangisa and E.P. Wentworth (Rhodes University)
- Title: SoftBridge: A Multimodal Instant Messaging Bridging System
Authors: J. Lewis, W. Tucker and E. Blake (University of Cape Town)
- Title: A Performance Comparison of Web Development Technologies to Distribute Multimedia across an Intranet
Authors: D. Swales, D. Sewry and A. Terzoli (Rhodes University)
- Title: A Comparative Analysis of Java and .NET Mobile Development Environments for Supporting Mobile Services
Authors: X. Zhao and P. Clayton (Rhodes University)
- Title: Secure Payment Platform for M-Commerce Macro-Transactions
Authors: O.E. Balatseng and H.E. Hanrahan (University of the Witwatersrand)
- Title: A secure M-Commerce system for the vending of prepaid electricity tokens
Authors: L. E. Sebola and W.T. Penzhorn (University of Pretoria)
- Title: Automated Attack Analysis and Code Generation in a Multi-Dimensional Security Protocol Engineering Framework
Authors: S. Lukell, C. Veldman and A. Hutchison (University of Cape Town)
- Title: Design and Implementation of Fast Multiplication Algorithms in Public Key Cryptosystems for Smart Cards
Authors: G. Joseph and W.T. Penzhorn (University of Pretoria)
- Title: Elliptic Curve Cryptography
Authors: M.A. Salie and C. Omlin (University of the Western Cape)

Core Network Papers

- Title: A Network Operator's Perspective on IP VPNs
Authors: J. van Greunen and R. Achterberg (Telkom)
- Title: Quality of Service in the Internet Age
Authors: R. Majoor (Telkom)
- Title: A Simulation of a Bandwidth Market
Authors: A.E. Krzesinski and K.E. Muller (University of Stellenbosch), B.A. Chiera and P.G. Taylor (University of Melbourne)
- Title: Carrier Grade IP Networks
Authors: C. van Wyk (Alcatel)
- Title: Buffer Management Mechanisms for the Assured Forwarding Traffic Class
Authors: J. Mentz, N. Ventura and S. Shepstone (University of Cape Town)
- Title: Rainbow Services: A New Architecture for QoS Provisioning in the Future Internet
Authors: G.E. Ojong and F. Takawira (University of Natal)
- Title: Ant Routing Simulation
Authors: B.A. Bagula, H.A.C. de Villiers, J. du Toit, A.E. Krzesinski, M. Loubser and J.G. van der Horst (University of Stellenbosch)
- Title: Simulation of the SCTP Failover Mechanism
Authors: M. Minnaar (Telkom), D.W. Ngwenya and W.T. Penzhorn (University of Pretoria)
- Title: Policy Based Network Management of a Differentiated Services domain using the Common Open Policy Service protocol
Authors: A. Burke and N. Ventura (University of Cape Town)
- Title: Internet Protocol version 6 Network Migration and Performance Analysis
Authors: A.J. Thalmann and N.G. Harris (University of the Witwatersrand)
- Title: Modelling of Ethernet traffic with self-similar processes
Authors: A. du Plessis and M.A. van Wyk (Rand Afrikaans University)
- Title: Online Traffic Engineering using Least Interference Optimization
Authors: A.B. Bagula, M. Botha, and A.E. Krzesinski (University of Stellenbosch)
- Title: Statistical fairness bounds of two CDMA-based wireless packet schedulers
Authors: S.M. Scriba and F. Takawira (University of Natal)
- Title: Visualizing QoS in IP Networks
Authors: W. Grift (University of Stellenbosch)
- Title: Network simulation for the effective extraction of IP network statistics
Authors: L. Swanepoel and A.S.J. Helberg (University of Potchefstroom)
- Title: A Web Browsing Traffic Model for Simulation: Measurement and Analysis
Authors: L.O. Walters and P.S. Kritzinger (University of Cape Town)
- Title: Network Visualisation with 3D Metaphors
Authors: M.Tsegaye (Rhodes University)

Network Planning Papers

Title: The Impact of Wireless Evolution on Radio Planning in South Africa
Authors: A. Kurien and L.W. Snyman (Technikon Pretoria), D. Chatelain (French-South African Technical Institute of Electronics)

Title: Cost-effective Data-Enabled Network Design for the Ga-Rankuwa and Soshanguve Areas near Pretoria
Authors: P. Mailula and L.W. Snyman (Technikon Pretoria)

Title: An adapted exact algorithm for solving extended tree knapsack problems for Local Access Telecommunication Network design issues
Authors: D.J. van der Merwe and J.M. Hattingh (Potchefstroom University for CHE)

Title: Comparative Study to Characterize Service Areas for Access Network Planning and Investment Assessment
Authors: T.D. Baloyi and P.J. Chitamu (University of the Witwatersrand)

Title: Maximum Power Point Tracking methods for small scale Wind Turbines
Authors: G. Moor and J. Beukes (University of Stellenbosch)

Title: A Cost Analysis of Telecommunication Investments
Authors: R. Tar-Mahomed and P. Chitamu (University of the Witwatersrand)

Next Generation Network Papers

Title: A Comparative Study of Telecommunications Architectures: methodology and case studies
Authors: H.E. Hanrahan (University of the Witwatersrand)

Title: Asterisk: A Converged TDM and Packet-based Communications System
Authors: J. Penton and A. Terzoli (Rhodes University)

Title: Resource Allocation in the Next Generation Core Network with Dense Wave Division Multiplexing (DWDM) Backbone
Authors: T. Kawonga and H.E. Hanrahan (University of the Witwatersrand)

Title: A Multiple Time Scale, Aggregate Source Model for Edge Traffic in the Next Generation Network
Authors: P. Plantinga and H.E. Hanrahan (University of the Witwatersrand)

Title: Investigating Call Control using MGCP
Authors: A. Jacobs and P. Clayton (Rhodes University)

Title: Service Portability made possible with SIP
Authors: D.U. Koen (Siemens)

Title: A top-down approach to Telemedicine provisioning by moving the service intelligence into the Telecomm Domain
Authors: M. Stiglic, H.E. Hanrahan (University of the Witwatersrand)

Title: A Process to Design a Performance Management Framework for the ODP-NGN
Authors: D. Magaya and H.E. Hanrahan (University of the Witwatersrand)

Title: Design of Emergency Services: An Enterprise Viewpoint
Authors: G. Khayltash and H.E. Hanrahan (University of the Witwatersrand)

Title: Conceptual QoS Framework for Managing End-User Services in the Next Generation Network
Authors: D. Mwansa and H.E. Hanrahan (University of the Witwatersrand)

Title: The Concepts and Principles to Design a Performance Management Framework for the ODP-NGN
Authors: D. Magaya and H.E. Hanrahan (University of the Witwatersrand)

Other Topic Papers

- Title: Effect of Flat Rate Call Costs on Dial-up Subscribers' Holding Times
Authors: D.E. Vannucci and I.G. Kennedy (University of the Witwatersrand)
- Title: Convergence within a Developing Economic Environment: a Strategic Perspective of Interoperability in the SADC
Authors: M. Fricke (University of Pretoria)
- Title: How Can the Cost of Telecommunications Access in Africa be Driven Downwards?
Authors: P.J. Chitamu, R. van Olst and D. E. Vannucci (University of the Witwatersrand)
- Title: The Artificial Immune System for Fraud Detection in the Telecommunications Environment
Authors: A.J. Graaff and A.P. Engelbrecht (University of Pretoria)
- Title: A Case Study of Software Development Processes in the Telecommunication Industry
Authors: W.H.M. Theunissen and D.G. Kourie (University of Pretoria)

Transport Network Papers

- Title: Integrating Data Interfaces into SDH
Authors: J.J. Nel (Marconi)
- Title: Buffering in All-Optical Packet-Switching
Authors: R. Geldenhuys and F.W. Leuschner (University of Pretoria)
- Title: Gain Equalization of Erbium Doped Fibre Amplifiers with Tuneable Long-Period Gratings
Authors: T.J. Nhlapo, P.L. Swart and A.A. Chtcherbakov (Rand Afrikaans University)
- Title: Optical Frequency Multiplication for Broadband Wireless Applications with Optical Periodic Filter Design using Fibre Bragg Gratings
Authors: K. Madingoane and P.L. Swart (Rand Afrikaans University)
- Title: Survivable Routing for WDM Networks: Challenges faced by the South African Service Providers.
Authors: B.T. Mangara and F.W. Leuschner (University of Pretoria)
- Title: Optical Backbone-Distributed switching networks
Authors: M.W. Nonkomo and R. Sewsunker (University of Durban-Westville), P.J. Chitamu (University of Witwatersrand)
- Title: A Review of Signaling Scenarios and Intelligence in All-Optical Wavelength Switched Backbone Networks
Authors: Z. Moosa and R. Sewsunker (University of Durban Westville), S.H. Mnene (University of Natal)
- Title: Dispersion slope compensation of DWM channels using superposition chirped Bragg grating
Authors: K. Saleh (Rand Afrikaans University)
- Title: The Effect of Cabling on the PMD of an Optical Fibre
Authors: U. van Antwerpen, A.B. Conibear and A.W.R. Leitch (University of Port Elizabeth)
- Title: Locating bad PMD sections with a Polarization-OTDR
Authors: Johan Visser (Telkom), M. Leblanc and R. Salmi (EXFO), A.B. Conibear and A.W.R. Leitch (University of Port Elizabeth)
- Title: Chromatic Dispersion and Polarization Mode Dispersion Measurements over an Ultra-Long Haul Submarine Fiber Optics Link
Authors: F. Audet and R. Salmi (EXFO Electro-engineering), P. Pilgrim (Hibernia Atlantic, UK)
- Title: Polarization Mode Dispersion: Single Mode Fibre Emulation and Characterization
Authors: T.B. Gibbon, A.B. Conibear and A.W.R. Leitch (University of Port Elizabeth)

Voice Papers

- Title: Using ABR-service for a call centre application: speaker recognition
Authors: D.J. Mashao and M. Ashibani (University of Cape Town)
- Title: Call Centre Speaker Identification using Telephone and GSM Data
Authors: L. Lerato and D. Mashao (University of Cape Town)
- Title: Implementation of A Polynomial Approximation-Based Smoothing Technique For Robust Speaker Verification Over Telephony Networks
Authors: L. Mothae and D. Mashao (University of Cape Town)
- Title: ChattaBox: A Case Study in Using UML and SDL for Engineering Concurrent Communicating Software Systems
Authors: P.S. Kritzinger, M. Chetty, J. Landman, M. Marconi and O. Ryndina (University of Cape Town)
- Title: A generic decoder for cyclic codes of the form $g(x) \mid P(x)$ from $GF(2^m)$ that can recover packet erasures
Authors: D.J.J. Versfeld and H.C. Ferreira (Rand Afrikaans University), A.S.J. Helberg (Potchefstroom University for Christian Higher Education)
- Title: Fixed Mobile Convergence: The IN Solution
Authors: H. van Zyl (Siemens Telecommunications)
- Title: Verification of Service Level Agreements with Markov Reward Models
Authors: F. Lifson (University of Cape Town)

Plenary Papers

- Title: Standardization in ETSI - a contribution to innovation and to the opening of the global market – including South Africa
Authors: K.H. Rosenbrock (ETSI - Director-General)
- Title: A Vision for the Target Next Generation Network
Authors: H.E. Hanrahan (University of the Witwatersrand)
- Title: Guessing Right in A Changing Game
Authors: J.D. O'Neill (Greenberg Traurig, LLP)
- Title: IP/MPLS and NG-SDH Enable the Profitable Path to IP Generation
Authors: A. Kankkunen (Tellabs)
- Title: Mobile phone users want services that will help them manage their increasingly complex lives more efficiently.
Authors: W. Hearmon (Motorola)
- Title: The Global Battle Against Telecom Fraud
Authors: R. Shelton (Cerebrus)
- Title: The Innovation Hub - Home of the hi-tech entrepreneur
Authors: J. Sawers (The Innovation Hub)
- Title: The SA ICT Industry: Opportunities Abound
Authors: R. Dawes (Electronics Industry Federation)
- Title: EDGE: The Introduction of High Speed Data in GSM / GPRS Networks
Authors: W. Florence (Ericsson)

White Papers

- Ericsson: Introduction of high-speed data in GSM/GPRS networks

Work in Progress Papers

- Title: Recourse Dimensioning in Internet Protocol Virtual Private Networks (IP VPN)
Authors: S. Roon (University of Pretoria)
- Title: The effect of Cellular Network Parameters on GPRS Performance
Authors: N.C. Malan and A.S.J. Helberg (Potchefstroom University for Christian Higher Education)
- Title: The Effect of Scheduling Induced Delay on Stochastic Quality of Service
Authors: J.J. Smit, H.C. Ferreira and M.A. Van Wyk (Rand Afrikaans University)
- Title: Quality of Service Provisioning in the Wireless Mobile Internet
Authors: M.W. Nkambule (Zululand University)
- Title: User Context Functionality Requirements for Next Generation Network Services
Authors: R. Christian and H.E. Hanrahan (University of the Witwatersrand)
- Title: The Visualization of Application Performance for a Customer Network
Authors: J. Rademan, J. Wesson and D. van Greunen (University of Port Elizabeth)
- Title: The Development of a Model to Simulate Application Performance on a University Network
Authors: M. Koorsse, A. Calitz and L. Cowley (University of Port Elizabeth)
- Title: Intelligent Fraud Detection
Authors: O.A. Abidogun and C.W. Omlin (University of the Western Cape)
- Title: Improving the Accuracy of Geospatial Positioning of a Standard Cellular Phone
Authors: T. Mwakabaga, R. van Olst and B. Dwolatzky (University of the Witwatersrand)
- Title: Towards Universal Access to Telecommunication Services in Rural Areas via Satellite Communication
Authors: H.P. van Tonder (University of Stellenbosch)
- Title: Optimising Communication Utility of Low Earth Orbiting Satellites
Authors: M. Poole (Stellenbosch University)
- Title: Stress-induced Mode Coupling in Optical Fibres
Authors: N.A. Sibaya, A.B. Conibear, A.W.R. Leitch (University of Port Elizabeth)
- Title: Formal Modeling of Secure mobile-commerce services
Authors: D.P. Biyela and M.O. Adigun (University of Zululand)
- Title: Application of Face Recognition with Mobile Phones
Authors: S. da Silva and J.I. Agbinya (University of the Western Cape)
- Title: Using XML Messaging for Wireless Middleware Communication
Authors: W.S. Hanslo and K.J. MacGregor (University of Cape Town)
- Title: Using free and open source software to implement a Java based e-commerce web application
Authors: M. Msimanga and N.H. Muyingi (University of Fort Hare), A. Terzoli (Rhodes University)
- Title: Handheld Fast-track Feedback Instant Messaging
Authors: K.A. Adesemowo and W.D. Tucker (University of the Western Cape)
- Title: Using Voice over IP to Bridge the Digital Divide -A Critical Action Research Approach
Authors: M. Chetty, W. Tucker and E. Blake (University of Cape Town)
- Title: SoftBridge in Action: The First Deaf Telephony Pilot
Authors: W.D. Tucker, M. Glaser and J. Lewis (University of Cape Town)
- Title: Towards an Enterprise-Component Architecture for M-Commerce Services
Authors: H.P. Kunene and M.O. Adigun (University of Zululand)
- Title: Developing a SIP User Agent as an Interaction Tool for Remote Audiences of Streamed Lectures
Authors: N. Mpofo and H.N. Muyingi (University of Fort Hare), A. Terzoli (Rhodes University)
- Title: Floor Control Arbitration for a Hybrid Voice/Text Web-board
Authors: A.E. Benjamin and W.D. Tucker (University of the Western Cape)

Title: Numeric String Recognition in Setswana
Authors: K.G. Mamadisa, H.J. Oosthuizen and M.J.D. Manamela (University of the North)

Title: Fast Prototyping of Niche Search Engines for Images using SVMs
Authors: L.E. Botha and C.W. Omlin (University of the Western Cape)

Title: Design and construction of an Talking Call Line Identity unit
Authors: M.A. Beukes (Rand Afrikaans University)
