

# **Southern African Telecommunication Networks and Applications Conference (SATNAC) 2004 Proceedings CD-ROM**

**6 – 8 September 2004 Spier Wine Estate, Western Cape, South Africa**

ISBN 0-620-32632-8

**Southern African Telecommunication Networks and Applications Conference (SATNAC)\*  
2004 Proceedings CD-ROM**

**Publication Information**

Title: Southern African Telecommunication Networks and Applications Conference (SATNAC) 2004  
Proceedings CD-ROM  
ISBN: 0-620-32632-8  
Format: CD-ROM  
Compiled by: Zoltan Miklos (Telkom)  
Editor: David Browne (Telkom)  
Date of print: 29 August 2004  
Version: First Edition

\* SATNAC is the flagship of the Telkom Centre of Excellence (CoE) Programme.

## Plenary

Title: NGN Service Rollouts in Europe  
Authors: M. Jadoul and E. Osstyn (Alcatel)

Title: Service Delivery Platform Options for Next Generation Networks, approved within the national German 3G Beyond Testbed  
Authors: T. Magedanz, D. Witaszek, K. Knuttel (Fraunhofer Institute FOKUS Berlin, Germany)

Title: Efficient Capacity Provisioning in Delay Constrained IP Networks  
Authors: I. Atov, R.J. Harris (Royal Melbourne Institute for Technology)

## Access

Title: Uplink Blocking Probabilities in Heterogenous WCDMA Networks considering Other - Cell Interference  
Authors: A. Mader and D. Staehle (University of Wurzburg)

Title: Code-aided Blind Adaptive Cyclic Multiuser Detection  
Authors: J. Whitehead and F. Takawira (University of KwaZulu-Natal)

Title: Performance analysis of a MAC protocol for wireless IP/CDMA networks  
Authors: S. B. Mahlaba and F. Takawira (University of KwaZulu-Natal)

Title: Neural Network-Based Multiuser Detection in a Simple AWGN CDMA Environment  
Authors: N. Moodley and S. H. Mneney (University of KwaZulu-Natal)

Title: Low Cost Satellite Communication - Space Weather and Commercial Electronic Components  
Authors: F. Smith and S. Mostert (University of Stellenbosch)

Title: Comparing ADSL Theoretical Noise Models with Practice  
Authors: J. H. van Wyk and L. P. Linde (University of Pretoria)

Title: Multiservice Downlink Admission Control in a CDMA Environment  
Authors: N. B. Ramlakhan and F. Takawira (University of KwaZulu-Natal)

## Access & Coding

Title: Fourier Transform Decoding of Non-Binary LDPC Codes  
Authors: G. J. Byers and F. Takawira (University of KwaZulu-Natal)

Title: Sub-Optimal Linear Block Code Decoding  
Authors: S. M. Elengical, F. Takawira and H. Xu (University of KwaZulu-Natal)

Title: Adaptively Weighted Space-Time Trellis Codes  
Authors: J. N. Pillai and S. H. Mneney (University of KwaZulu-Natal)

Title: An Iterative Soft-Input Soft-Output Decoding Algorithm for Linear Block Codes  
Authors: T. M. N. Ngatched and F. Takawira (University of KwaZulu-Natal)

Title: High Rate Space -Time Trellis Coded Modulation with Imperfect Channel Estimation  
Authors: O. Sokoya, H. Xu and F. Takawira (University of KwaZulu-Natal)

Title: Investigation of the effect of LDPC coding on the sparseness of a data source in AWGN channel conditions  
Authors: J. Schoeman and L. P. Linde (University of Pretoria)

## Mobile Communications

Title: The use of a Third Party Proxy in Achieving GSM Anonymity  
Authors: N. J. Croft and M. S. Olivier (University of Pretoria)

Title: Viability of Using Smart Antenna Systems in GSM Cellular Networks  
Authors: J. Rugamba, L. W. Snyman, A. Kurien and D. Chatelain (Tshwane University of Technology)

Title: Vertical Handover in Cellular Communication Networks  
Authors: M. M. Gordon (University of the Western Cape) and J. I. Agbinya (University of Technology, Sydney)

Title: Predicting mobility on the Wireless Internet Using Sectorized-cell Approach  
Authors: M. W. Nkambule, G. Ojong and M. O. Adigun (University of Zululand)

Title: A Self-Organizing Maps Model for Outlier Detection in Call Data from Mobile Telecommunication Networks  
Authors: O. A. Abidogun and C. W. Omlin (University of the Western Cape)

Title: Trustworthy Key Management for Mobile Ad Hoc Networks  
Authors: J. van der Merwe, D. Dawoud and S. McDonald (University of KwaZulu-Natal)

## Radio & WLAN

Title: BER Performance for Residue based Space-Time-Frequency coding in a Rapid fading channel  
Authors: R. N. Akol and F. Takawira (University of KwaZulu-Natal)

Title: Multipath channel modeling for terrestrial line-of-sight links at 19.5 GHz  
Authors: K. Naicker and S. H. Mneney (University of KwaZulu-Natal)

Title: Advanced Asymmetric Filter Bank Based ADC for Software Defined Radio Applications Utilizing Frequency-Response Masking (FRM) Approach  
Authors: S. E. Phakathi and D. S. Dawoud (University of KwaZulu-Natal)

Title: An Experimental Multi-Hop Ad-Hoc Network  
Authors: D. Waiting, N. Ventura and S. Shepstone (University of Cape Town)

Title: An Evaluation of Mobile IP Movement Detection  
Authors: A. Hasson and N. Ventura (University of Cape Town)

Title: Benefits and Requirements of Interworking between WirelessLAN and 3G Wireless  
Authors: H. A. Chan (University of Cape Town)

## Transport & Optical Networks

Title: Design for Optical Control for Recirculating Buffering  
Authors: R. Geldenhuys and W. Leuschner (University of Pretoria)

Title: Optical add/drop multiplexer using short- and chirped long-period fibre gratings for dense wavelength-division multiplexing  
Authors: R. Kritzinger and P. L. Swart (Rand Afrikaans University)

Title: PMD and Polarization-OTDR Measurements on an Optical Fibre-link  
Authors: J. F. Visser, N. A. Sibaya, T. B. Gibbon, A. B. Conibear and A. W. R. Leitch (University of Port Elizabeth)

Title: Power Line Communications in Telecommunications Access Areas  
Authors: T. E. Mhlongo and T. J. Afullo (University of KwaZulu-Natal)

Title: Algorithmic considerations for the problem of dimensioning SDH Self-healing Rings  
Authors: S. E. Terblance, J.M. Hattingh (North-West University)

Title: PMD Compensation: Real-Time Monitoring of Differential Group Delay and Principal States of Polarization  
Authors: T. B. Gibbon, A. B. Conibear and A. W. R. Leitch (University of Port Elizabeth)

## Modelling & Simulation

Title: Large-scale hierarchical networks: How to compute an optimal architecture?  
Authors: A. Bley, T. Koch and R. Wessälly (Zuse Institute Berlin)

Title: Scheduler Performance Evaluation and the Effects of Aggregation on QOS in a Diffserv Enabled Network  
Authors: J. J. Smit and H. C. Ferreira (Rand Afrikaans University)

- Title: Automated Generation of Poisson-Voronoi Tessellations in R2 for NS  
 Authors: M. Minnaar and D.W. Ngwenya (University of Pretoria)
- Title: The Effects of Using Change Detection Algorithms in Estimation of the Average RTT  
 Authors: D. W. Ngwenya and G. P. Hancke (University of Pretoria)
- Title: Packet violation probability analysis of the Earliest Deadline First scheduler  
 Authors: S. M. Scriba and F. Takawira (University of KwaZulu-Natal)
- Title: Network Application Performance Modelling  
 Authors: M. Koorsse, L. Cowley and A. Calitz (University of Port Elizabeth)

## Planning, Simulation and Operational Issues

- Title: An Auction Scenario in a Stock Market using M2 Agent  
 Authors: A. O. Oluwatope, G. A. Aderounmu, O. Akande and M. O. Adigun (Obafemi Awolowo University, Nigeria)
- Title: Channel Throughput Enhancement of an Automatic Position Reporting System Network with MAC Layer Protocol Optimization  
 Authors: H. P. van Tonder (University of Stellenbosch)
- Title: Development of a Data Source Model for Field Force Automation Systems  
 Authors: N. C. Malan and A. S. J. Helberg (North-West University)
- Title: Electronic Data Collection using Mobile Computing Technologies  
 Authors: R. van Olst (University of the Witwatersrand)
- Title: Application of an Adapted Multiple Criteria Decision Aid Evaluation Process using Uncertain Criteria Networks  
 Authors: W. A. Pretorius and A. S. J. Helberg (North-West University)
- Title: Data Capturing System Using Cellular Phone, Verified Against Propagation Models  
 Authors: S. W. J. Visser (University of Stellenbosch)

## Next Generation Network

- Title: Modelling Convergence: Technology Layering for Horizontal Regulation  
 Authors: H.E. Hanrahan (University of the Witwatersrand)
- Title: User Context Functionality Requirements for Next Generation Network Services  
 Authors: R. Christian and H.E. Hanrahan (University of the Witwatersrand)
- Title: DAOMAP: A Distributed IPv6 Multicast Address Allocating Protocol  
 Authors: M. Slaviero and M. S. Olivier (University of Pretoria)
- Title: Formalising the Next Generation Network End-User QoS Signalling and Control Framework  
 Authors: D. Mwansa and H.E. Hanrahan (University of the Witwatersrand)
- Title: The Implementation of a Differentiated Services Architecture on Network Processors  
 Authors: T. Sassen, N. Ventura and S. Shepstone (University of Cape Town)
- Title: Converged Charging - Meeting the needs of operators for Next Generation Charging  
 Authors: C. Reeder (Siemens Telecommunications)

## Software & Network

- Title: An evaluation of Free and Open Source e-commerce web application technology with regard to SMMEs  
 Authors: M. Msimanga and J. Chadwick (University of Fort Hare)
- Title: A Preliminary Investigation of the Impact of Open Source Software on Telecommunication Software Development  
 Authors: W. H. M. Theunissen, A. Boake and D. G. Kourie (University of Pretoria)
- Title: Improving Requirements Specification for Communication Services with Formalised Use Case Models  
 Authors: O. Ryndina and P. Kritzinger (University of Cape Town)

Title: Towards Model-Based Communication Protocol Performability Analysis with UML 2.0  
Authors: N. de Wet and P. Kritzinger (University of Cape Town)

Title: The Visualisation of Application Delay Metrics for a Customer Network  
Authors: J. Rademan, J. L. Wesson and D. van Greunen (University of Port Elizabeth)

## Voice & Services

Title: iLanga: A Next Generation VoIP-based, TDM-enabled PBX  
Authors: J. Penton and A. Terzoli (Rhodes University)

Title: Design of A Geospatial Data Access Service Capability Feature for the Parlay/OSA Gateway  
Authors: L. K. Masenya, H. E. Hanrahan and B. Dwolatzky (University of the Witwatersrand)

Title: QoS for Voice over Packet Infrastructures in NGN's  
Authors: G. Perumal and B. M. Nleya (University of KwaZulu-Natal)

Title: Telemedicine in the Eastern Cape using VoIP combined with a Store and Forward Approach  
Authors: M. Chetty, W. D. Tucker and E. Blake (University of Cape Town)

Title: Teleworking As A Telco Service Enterprise And Information Views  
Authors: M. A . Akin-Ojo and H. E. Hanrahan (University of the Witwatersrand)

Title: Expansion of Parlay X API for Enhanced Web Services  
Authors: S. A. Tholo and H. E. Hanrahan (University of the Witwatersrand)

## Traffic Engineering

Title: Online Traffic Engineering Using A Hybrid IGP+MPLS Routing Approach  
Authors: A. B. Bagula and A. E. Krzenski (University of Stellenbosch)

Title: Optimizing Resource Dimensioning in a Mixed Traffic Environment  
Authors: S. Roon (University of Pretoria)

Title: LLQ in Integrated Services Networks  
Authors: K. J. Mabe (Rand Afrikaans University)

Title: Approximate Analysis of Multiple Source Queue System with Input Regulation  
Authors: Y-S. Liu, F. Takawira and H-J. Xu (University of KwaZulu-Natal)

Title: Optimization of network mesh topologies and link capacities for congestion relief  
Authors: D. de Villiers and J. M. Hattingh (North-West University)

Title: A bandwidth market approach to resource distribution between working and recovery paths  
Authors: A. E. Krzesinski and K .E. Muller (University of Stellenbosch)

## Multimedia & General

Title: Video Compression for Very Low Bit-Rate Communications Using Fractal and Wavelet Techniques  
Authors: Y. Brijmohan and S. H. Mneney (University of KwaZulu-Natal)

Title: Recursive Estimation of Head Pose in a Model Based Video Coding System  
Authors: J. Heathcote, B. Naidoo and S. McDonald (University of KwaZulu-Natal)

Title: From Digital Image Matching to Tracking and Low Bit-Rate Video  
Authors: D. Carsky, B. Naidoo and S. McDonald (University of KwaZulu-Natal)

Title: Using Audio to Enhance Personal Information Management  
Authors: M. Tsegaye (Rhodes University)

## Speech Recognition & General

- Title: Improving Speaker Identification Performance for Telephone-based Applications  
Authors: M. Skosan and D. Mashao (University of Cape Town)
- Title: A combination of Speaker- and Channel-Normalization for recognition of Telephone and GSM speech  
Authors: S. Lupembe and D. Mashao (University of Cape Town)
- Title: Aspects of Automatic Speech Recognition (ASR) with respect to Sepedi (Northern Sotho)  
Authors: T. M. Modiba, H.J. Oosthuizen and M. J. D. Manamela (University of the North)
- Title: Numeric String Recognition in Setswana  
Authors: K. G. Mamadisa, H. J. Oosthuizen and M. J. D. Manamela (University of the North)
- Title: ICT Services for Poor Rural Community Development - What is Missing in Current Implementations?  
Authors: S. Moshapo and H. E. Hanrahan (University of the Witwatersrand)
- Title: AAL2 Tunneling over IP in the UTRAN  
Authors: B. Chabalala, N. Ventura and S. Shepstone (University of Cape Town)

## Web Services & General

- Title: Using Forward Error Correction to Protect Real-Time Data Against Packet Loss  
Authors: D. J. J. Versfeld, H. C. Ferreira and A. S. J. Helberg (Rand Afrikaans University)
- Title: Access control for service-oriented computing  
Authors: M. Coetzee and J. H. P. Eloff (University of Pretoria)
- Title: A Closer Look at Peer-to-Peer Systems - going beyond music sharing  
Authors: X. Zhao, P. Clayton and G. Wells (Rhodes University)
- Title: The Visualisation of Internet Usage  
Authors: G. S. Lee Son and A. P. Calitz (University of Port Elizabeth)
- Title: Successful Innovation through Idea Management  
Authors: J. M. Conroy, A. J. Graaff, W. H. A. Senekal and A. W. Smith (Telkom SA)

## Security & Innovation

- Title: A Cryptosystem based on a Combination of Three Computationally Secure Algorithms  
Authors: T. K. Yesufu and O. R. Amao (Obafemi Awolowo University, Nigeria)
- Title: High-speed Algorithms for Public-key Cryptosystems in an e-Commerce Environment  
Authors: G. Joseph and W. T. Penzhorn (University of Pretoria)
- Title: Selection of an Attack-Construction Engine to Enhance Security Protocol Analysis  
Authors: S. Lukell and A. Hutchison (University of Cape Town)
- Title: Model Checking a Security Protocol  
Authors: C. P. Inggs, H. Barringer, A. Nenadic and N. Zhang (Telkom SA)
- Title: Provisioning of Secure Multi-Agent Systems Interaction Based on Trust Contracts  
Authors: D. P. Biyela, M. O. Adigun and J. D. M. Kinyua (University of Zululand)

## Work in Progress - Voice

Title: A SoftBridge with Carrier Grade Reliability Using JAIN SLEE  
Authors: T. Sun and W. D. Tucker (University of the Western Cape)

Title: SIP Presence Location Service  
Authors: W. Wu and A. Radovanovic (University of the Western Cape)

Title: Preparation of Deaf end-users and the SoftBridge for semi-automated relay trials  
Authors: M. Glaser, W. D. Tucker and D. Mashao (University of Cape Town)

Title: Temperature Dependence of Polarization Mode Dispersion  
Authors: L. Viljoen, A. B. Conibear and A. W. R. Leitch (University of Port Elizabeth)

Title: An Investigation into Eye Tracking and its Application in Usability Evaluation of Network Management Tools  
Authors: M. C. Pretorius, A. P. Calitz and D. van Greunen (University of Port Elizabeth)

Title: Floor Control Arbitration for a Hybrid Voice/Text Web-board  
Authors: A. E. Benjamin and W. D. Tucker (University of the Western Cape)

## Work in Progress - Software

Title: Open User Interconnect and Quality of Communication  
Authors: W. D. Tucker, E. H. Blake and G. Marsden (University of Cape Town)

Title: Software Quality Assurance in a Remote Client/Contractor Context  
Authors: A. Black, R. J. Foss and B. Klinkrandt (Rhodes University)

Title: SLA Compliance through Network Management  
Authors: Y. Motara and P. Clayton (Rhodes University)

Title: A comparison of open source Native Xml Database products  
Authors: N. Mabanza and J. Chadwick (University of Fort Hare)

Title: A multilanguage, open source approach to connecting user interfaces to a next-generation PBX  
Authors: J. Hitchcock, J. Penton and A. Terzoli (Rhodes University)

## Work in Progress – Mobile & WLAN

Title: Investigation of the Capacity Improvements in the GSM 900 MHz Band Through the Use of Heterogeneous Radio Access Technologies (GSM900 AND CDMA2000 1X)  
Authors: I. T. Durston and P. J. Chitamu (University of the Witwatersrand)

Title: Mobility Management in Wireless IP Networks  
Authors: M. J. R. Ngwane, G. E. Ojong and M. O. Adigun (University of Zululand)

Title: Evaluating the viability of small scale, easily deployable and extensible hotspot management systems  
Authors: M. Thinyane, G. Foster and P. Clayton (Rhodes University)

Title: Bluetooth Hotspots: Extending the reach of Bluetooth by transparently tunneling communications over IP Networks  
Authors: D. Mackie and P. Clayton (Rhodes University)

Title: Quality of Service of IEEE 802.11e  
Authors: C. Consani (University of Cape Town)

## Work in Progress - Services

Title: An IP based Multi-Modal Semi-Synchronous Rural Telehealth Service: Adding Video Messaging and Conferencing to MuTI  
Authors: X. Vuza and W. D. Tucker (University of the Western Cape)

- Title: Design of M-Commerce Architectural Framework for the National Park System  
 Authors: T. C. Khumalo and M. O. Adigun (University of Zululand)
- Title: A Multifunctional Smart Card based Platform to Support e-Government in South Africa  
 Authors: P. T. Nkomo and A. Terzoli (University of Fort Hare)
- Title: Instant Messaging on Handhelds: Affective Feedback  
 Authors: K. A. Adesemowo and W. D. Tucker (University of the Western Cape)
- Title: Towards Information Requirement Elicitation (IRE) Strategy for Interfacing Components in the M-Commerce Architecture  
 Authors: S. M. Zuma and M. O. Adigun (University of Zululand)

## Work in Progress - Web

- Title: Processing Web Logs in order to Mine Web Usage Patterns  
 Authors: C. P. Oosthuizen, J. Wesson and C. Cilliers (University of Port Elizabeth)
- Title: An email based issue- tracking workflow system that is extensible across organizational boundaries  
 Authors: Z. N. Kwinana, P. Wentworth, A. Terzoli (Rhodes University)
- Title: The Warehousing of Application Services Data to Facilitate Identification of Patterns of Network Usage  
 Authors: R. Knoetze, J. Wesson and C. Cilliers (University of Port Elizabeth)
- Title: Internet Registry Information Service Protocol  
 Authors: R. W. Murunga and A. Radovanovic (University of the Western Cape)
- Title: Design of a User Interface for a Multimedia Content Delivery Service  
 Authors: T. Machethe and H.E. Hanrahan (University of the Witwatersrand)
- Title: A web-based tool for ICT bilingual education  
 Authors: L. Dalvit, J. Hitchcock, S. Murray and A. Terzoli (Rhodes University)
- Title: Collaborative Peer-to-peer Services within Mobile Environments  
 Authors: X. Zhao, P. Clayton and G. Wells (Rhodes University)
- Title: Correlation between Packet Loss and delay in the South African Internet  
 Authors: M. Ramaisa, D. W. Ngwenya and G. P. Hancke (University of Pretoria)

## Work in Progress - Network

- Title: An Investigation into the Performance of a Sun N1 Grid Data Centre:a Case Study Approach  
 Authors: M. S. van Tonder and L. O. Cowley (University of Port Elizabeth)
- Title: Engineering Packet Loss Guarantees Across an IP Backbone  
 Authors: N. Engelbrecht (University of Pretoria)
- Title: Machine Learning Algorithms for Packet Routing in Telecommunication Networks  
 Authors: E. Nel and C. W. Omlin (University of the Western Cape)
- Title: Requirements for Next-Generation networks billing systems  
 Authors: M. A. Bihina Bella, J. H. P. Eloff, and M. S Olivier (University of Pretoria)
- Title: Guaranteed delivery of semi-synchronous IP-based communication  
 Authors: E. P. Julius and W. D. Tucker (University of the Western Cape)
- Title: Performance Analysis of IPSec in IPv6 Transition Mechanisms  
 Authors: M. Mujinga and H. N. Muyingi (University of Fort Hare)
- Title: Investigating IPv6 migration techniques in the context of University of Fort Hare Intranet  
 Authors: M. Vijayakurup and H. N. Muyingi (University of Fort Hare)
- Title: Local versus Global Face Analysis for Facial Expression Recognition  
 Authors: J. Whitehill and C. W. Omlin (University of the Western Cape)
- Title: VPN Provisioning using the OSA Parlay Connection Management Interface  
 Authors: J. Yan and H. E. Hanrahan (University of the Witwatersrand)

Title: Providing Reusable Blocks for Application Service Provision with Parlay/OSA  
Authors: O. Oni and H. E. Hanrahan (University of the Witwatersrand)

Title: Formalising the Next Generation "Signalling Network"  
Authors: B. Orimoloye and H. E. Hanrahan (University of the Witwatersrand)

Title: Resource Management in the Future Internet  
Authors: M. Mtshali, G. Ojong and M. O. Adigun (University of Zululand)

Title: Constructing Intrusion Detection Systems Models  
Authors: L. E. Arendse, J. Connan and C. W. Omlin (University Of the Western Cape)

Title: A United Patch Management Architecture  
Authors: D. White and B. Irwin (Rhodes University)

Title: Decryption of Wire-level Network Protocols for Forensic Inspection  
Authors: B. Irwin (Rhodes University)

Title: Security Considerations for an Idealised DRM Framework  
Authors: A. Arnab and A. Hutchison (University of Cape Town)

## Work in Progress – Access & Mobile

Title: Performance Analysis of a Hybrid Topology CDD/TDD-CDMA Network Architecture  
Authors: M. P. Powell and P. J. Chitamu (University of the Witwatersrand)

Title: Models of Internet Connectivity in Previously Disadvantaged Secondary Schools in the Eastern Cape  
Authors: I. Brandt, C. Hodgkinson and A. Terzoli (Rhodes University)

Title: Regenerative fuel cell in back-up power systems  
Authors: K. Swanepoel, M. J Case and H. C. vZ. Pienaar (Vaal University of Technology)

Title: Evaluation of state of the art speaker adaptation algorithms  
Authors: O. Noah and D. Mashao (University of Cape Town)

Title: Mobile Information Management: Using Mobile Devices to Investigate Paces of Interaction  
Authors: R. Schroder and G. Marsden (University of Cape Town)

Title: Faults and Service Modelling for Cellular Networks  
Authors: O. P. Ogeda, J. I. Agbinya and C. W. Omlin (University of the Western Cape)

Title: Real-time Content Filtering for Mobile Devices  
Authors: P. West, G. Foster and P. Clayton (Rhodes University)

Title: Human Face Segmentation Algorithms for Mobile Phones  
Authors: S. da Silva and J. I. Agbinya (University of the Western Cape)
